Brodskis' Works

Her work has been exhibited mainly throughout Europe. Brodskis' work evolves between conscious and unconscious spaces, leading to a reflection on the existence, the self and the otherness. In a recent [interview](#) she stated that:

“Taking on the task of questioning the foundation of human relationships while questioning the social context in which we live, a world in perpetual change, interwoven with ties that we do not understand. I use this complex richness, the social diversity that surrounds me, the confrontation of cultures and individuals“. The result is impressive. Enjoy.
